2024

ABOUT US —

NxtGen Rocket is a Leading Web, Mobile Apps & Quality Assurance Company. We challenge the standards of configuration, push the limits of advancement. NxtGen Rocket began in 2023, and we've not looked back rather are consistently discovering, developing & learning from that point forward.

We came so far and a lot has occurred in the previous years. We assembled things; we met such a significant number of individuals, made long lasting fellowships, adapted so much and developed in general. It was an uneven ride. Yet a wonderful goal isn't justified regardless of the battle of the voyage. We spend significant time in making ideas digital that are just usable, practical and sufficiently instinctive to improve life.

We Value Our People

It is not what makes NxtGen Rocket successful, it is who made it! Our experienced, knowledgeable, skilled & dedicated team is what we are proud of. We value our people more than anything else & take gratitude when we achieve tasks together.

Our Clients Are Our Reflection!

We deeply understand your intent & work accordingly. Because we measure success on basis of our clients feedback. We work with a motto of "Client satisfaction is our prime concern!"

We Do Not Compromise In Quality!

Having an impact is a commendable objective, yet helping individuals to accomplish the things along with the quality they need to accomplish is truly what we are associated with no to quality compromise

OUR OFFICES ACROSS GLOBE —

With a global network established, we have our offices covering 3 major countries India, USA, & UK! With a global impact, we have always created best user experiences with technology giving maximum ROI throughout the globe.

OUR DEVELOPMENT PROCESS —

OUR DEVELOPMENT PROCESS —

- We follow agile methodology with daily scrum and daily updates to the client. for websites we create a development environment, so clients can review it on a daily basis and share their comments.
- We maintain all tasks over JIRA/ Basecamp/Trello. This is based on project size. for bigger project we use JIRA.
- We uses GIT as a project repository. And we share this repository to the client from first day of project development.
- For communication we use Teams / Slack / Skype based on client preference.
- We are well experienced working with AWS & Azure hosting with CI/CD deployment.

VERTICALS WE HAVE SERVED —

SUCCESS STORY —

PHOTOGRAPHER'S WEBSITE

POTOGRAPHY WEBAPP

It is a SaaS based WebApp where the customer can add take a look of the photographer work and they can see price and book photographer for different events on different days.

ECOMMERCE MANAGEMENT WEBSITE

This website aimed at managing and generating orders of an individual if people wants to take a look of item and price of that product and they can also purchase it from website.

ECOMMERCE'S WEBSITE

LEARNING MANAGEMENT STSTEM

If you need to see student portal ask at
support@nxtgenrocket.com

LMS (Learning Management System)

It is a LMS (Learning Management System) product. Student can sign up and start learning Live and Recorded session on them 'Student Portal'. This portal is for students who wants to learn coding. If you need more info let us know at support@nxtgenrocket.com.

We can make CMS Portal as per you needed. We will take (45 Days) 39 Days for Development and 6 days for Testing end to end. We will allocate 7 people for this project. 3 dedicated developers (6+ years' experience), Project Manager, 2 QA Testers, Scrum master and DevOps Engineer.

We could make this project in \$11,999 +tax. If you need to detailed information about this charge we can schedule a call or send you detail info via email.

OUR WORK MODEL —

01

TIME & MATERIAL

NxtGen Rocket's Time & Material model offers the flexibility to modify project specifications, explore new activity and make changes to resources depending upon the evolving project lifecycle.

- > Best option when the project scope is constantly changing
- > Option for client to make hourly, daily, weekly or monthly payment
- > Flexible model, allowing client to experiment with new activity and requirements

MONTHLY HIRE / DEDICATED HIRE

Dedicated model works best for projects which require quick scaling or require expert developers to work on a long-term basis. This type of model is perfect to meet tight project deadlines, sudden team expansion or hiring a developer for emerging technologies.

- > Best model for clients with in-house staff to manage the projects
- > Get dedicated developers assigned to your project
- > Billing on fixed or hourly basis

02

03

ONSITE HIRING

Under the Onsite Delivery Model, we place skilled developers at the client's site, ensuring continuous interaction with the client's team for the stipulated contract period.

- > Face to face interaction with the client enables clear understanding of project results and expectations
- > Eliminates miscommunication as teams are working in close proximity
- > Ensures quick time-to market
